- ...

Individual project collection

NEU Parking Payment - Bachelor's thesis

2023

- Pioneered an advanced parking payment system as part of the Bachelor's thesis, employing the MERN stack and Socket.io for real-time functionality.
- Integrated Zalopay API to facilitate seamless mobile payments.
- Leveraged IoT devices to enhance parking management and user experience.
- Completed in 2023.

Chatty - Realtime chat app

2023

- Developed a responsive realtime chat application independently using the MERN (MongoDB, Express, React, Node.js) stack.
- Integrated Socket.io for seamless, instant communication among users.

Yii2 E-commerce

2022

- Created a comprehensive e-commerce platform using the Yii2 framework.
- Independently integrated Google and Facebook login APIs for streamlined authentication.
- Implemented seamless PayPal payment integration for secure transactions.

Selfbuilt MVC framework for PHP

2021

- Designed and implemented a customized Model-View-Controller (MVC) framework for PHP from scratch.
- Utilized PHP and MySQL to establish a robust foundation for dynamic web applications.
- Incorporated jQuery and Bootstrap for a polished user interface.
